

VIRKON S

The ultimate virucidal disinfectant for kennels

What's In It?

VIRKON S is a potent, safe, effective solution to controlling viruses, bacteria, fungi, yeast and moulds in kennels and feed preparation areas. It is provided in a convenient soluble tablet and powder form.

What Does It Do?

VIRKON S will safely control all common infectious agents which can cause problems in kennels and breeding establishments, including Parvovirus, Distemper and Hepatitis. Safe for all animals.

How Do I Use It?

Simply add 1 VIRKON S tablet to every 500mL water you use, and thoroughly wet all potentially contaminated surfaces and equipment, including feed bowls, etc. Leave on surface for 10 minutes and wash off with cold water. The solution is stable after preparation for 5 days.

How Is It Packed?

Available in 50 tablets and 5g sachets, 1kg, 2.5kg and 5kg packs
